

M&D solutions

...made in the USA!

Providing measurement solutions for the water treatment industry, M&D works with the experts. Questions? Call 630-655-1080. www.murphyanddickey.com

Magnetic Flowmeters

Rosemount's Municipal-Specific Flowmeters

Advantages Include:

- Diagnostics for meter verification
- Universal auto-trim for in-situ calibration
- Dual frequency design for noisy installations
- Scalable coil currents can drive any flowtube

Pressure Transmitters

Rosemount has over 50 years in the manufacture of Pressure Transmitters. With over 850,000 clients in 75 countries.

Advantages Include:

- Best-in-class
- Built-in Flow Library and easy configuration
- Sensor matching to reduce temperature error
- Replacement Parts & Upgrades available

Dissolved Oxygen & Suspended Solids Monitors

Insite IG manufactures simple and reliable measurements for water treatment applications.

Advantages Include:

- Optical measurement unaffected by sunlight
- Thousands of installations
- Simple programming and built-in curves
- Five-year warranty
- Available in portable versions

Sludge Blanket Level Analyzers Backwash Cycle Monitoring

Entech Design

A manufacturer that *specializes* in Sludge Level and Turbidity measurement! Their experience has produced direct measurement of the actual rate of expansion in each and every backwash cycle.

Advantages Include:

- High frequency sonar technology for accuracy
- Over 2,500 installations USA and worldwide
- Wireless Solutions are available
- Flexible mounting and self-cleaning options available
