

# M&D solutions

*dissolver simplicity*

Providing instrumentation for the water treatment industry, M&D works with experts in measurement to ensure the very best solution for you. [www.murphyanddickey.com](http://www.murphyanddickey.com)

## Solid Dissolvers

Hydro Systems has introduced a new approach to solid dissolvers. Low cost technology from different markets is applied to accomplish the same objective in a simple package. Hydro Systems took 40 years of experience of applying float technology in the car wash industry and combined it with 25 years of solid dispensing for industrial laundries and dishwashers. The result: consistent, reliable performance, reduced down time, and reduced service calls.

### Here are some advantages:

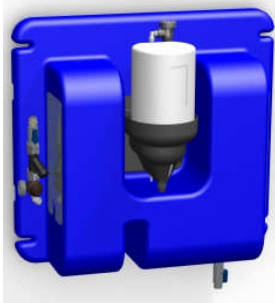

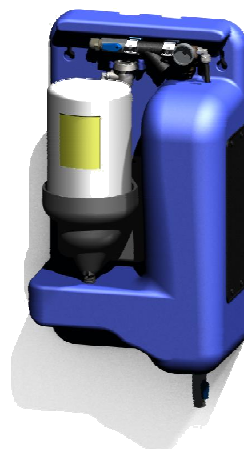

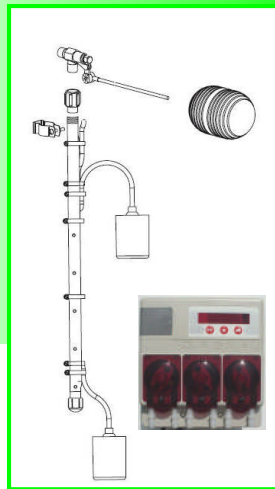

- o Use of line water pressure (30-90 psi)
- o Chemical Resistance
- o Specialized Nozzle Technology
- o Translucent Reservoir Body for level viewing.
- o Backflow / Overflow Protection
- o Adjustable pressure gauge
- o Removable filter
- o No moving parts, solenoids or reed switches.

**Questions?** Call or email M&D to review your requirements today. 630-655-1080

## EASY DISSOLVER INSTALLATION

1. Attach the unit using 4 bolts.
2. Hook the floats to the valves.
3. Attach the water inlet.
4. Attach the solution discharge tubing.

*That's it – It's ready to go to work!*
